# Installation Guide   7010 Peeler Unit

⚠ Caution

This guide is provided for use by service representatives who must install the peeler unit. If the peeler is not installed, please contact your supplier.

Note   Installation requires a cross-point ('Phillips') screwdriver with magnetic tip and a shaft at least 200 mm (8 inches) long.
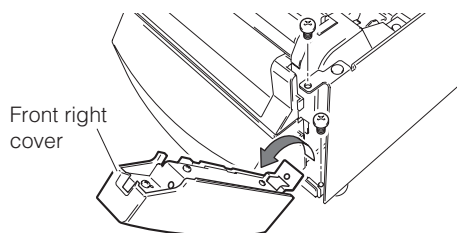

(1)   Check to make sure that the printer's power switch is turned off then disconnect the power cord.

(2)   Open the top cover and lift the thermal printhead and sensor arm.

(5)   Remove the front center cover. (2 screws)

Front center cover

(6)   Remove the plastic cover from the front center cover that you have removed.
       (2 screws)

Note   The plastic cover that you have removed is needed if the peeler unit is
             de-installed, so store it carefully.

Plastic cover

(7)   Attach the peel guide plate to the front center cover taking care not to over-tighten
   the screws as they are threaded in plastic. (2 screws)

Peel guide plate

(8) Attach the connector of the peeler unit to the daughter board as shown in the figure.

| Note | The connector cannot be connected if it is inserted in the wrong orientation unless force is used! Check the orientation of the connector carefully. |

(9) Slide the release knob of the peeler unit to the left and open the peeler unit.

(10) After positioning the peeler unit on the printer using the alignment pins on the peeler as a guide, fix the unit to the printer using the screw supplied. Then close the peeler.

| Note | Be careful not to pinch the wiring harness from the peeler unit. |

(11) Align the two tabs on the bottom of the 'front center cover' to the slits of the printer as it is slid in to the printer. The bottom plate of the front cover needs to be held up from below to ensure a good fit. Attach the front center cover from step 5 in its original position. (3 screws, of which 1 is an accessory to the unit)

(12) Attach the front right cover removed at step 4 in its original position. (2 screws)
(13) Attach the operation panel removed at step 3 in its original position. (3 screws)

Note	Be sure to connect the flexible cable that you disconnected as it was formerly connected. The blue side of the tip is upwards.

(14) Close the top cover.
(15) Connect the power cord and turn on the power switch on the printer.

Note	**Removing the peeler unit**
	To remove the peeler unit from the printer, follow the installation steps in reverse order. If the screws that fasten the peeler unit are removed, the unit may fall from the printer, so hold the peeler unit with your hand while loosening the fastening screws.
